

Reply to a Message

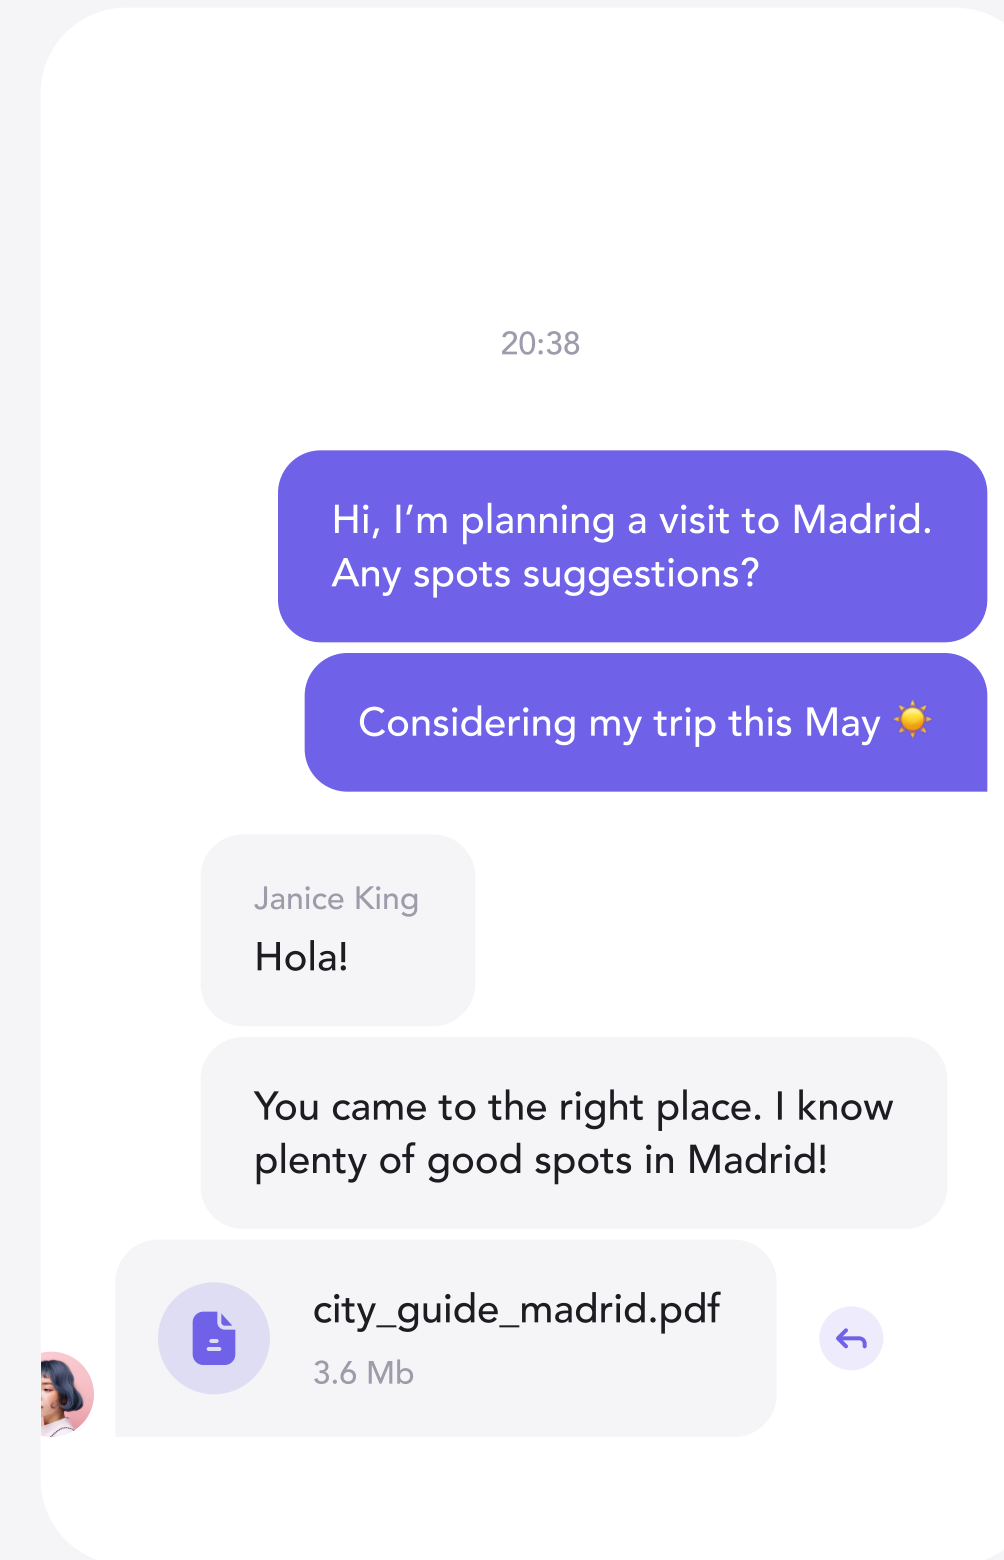

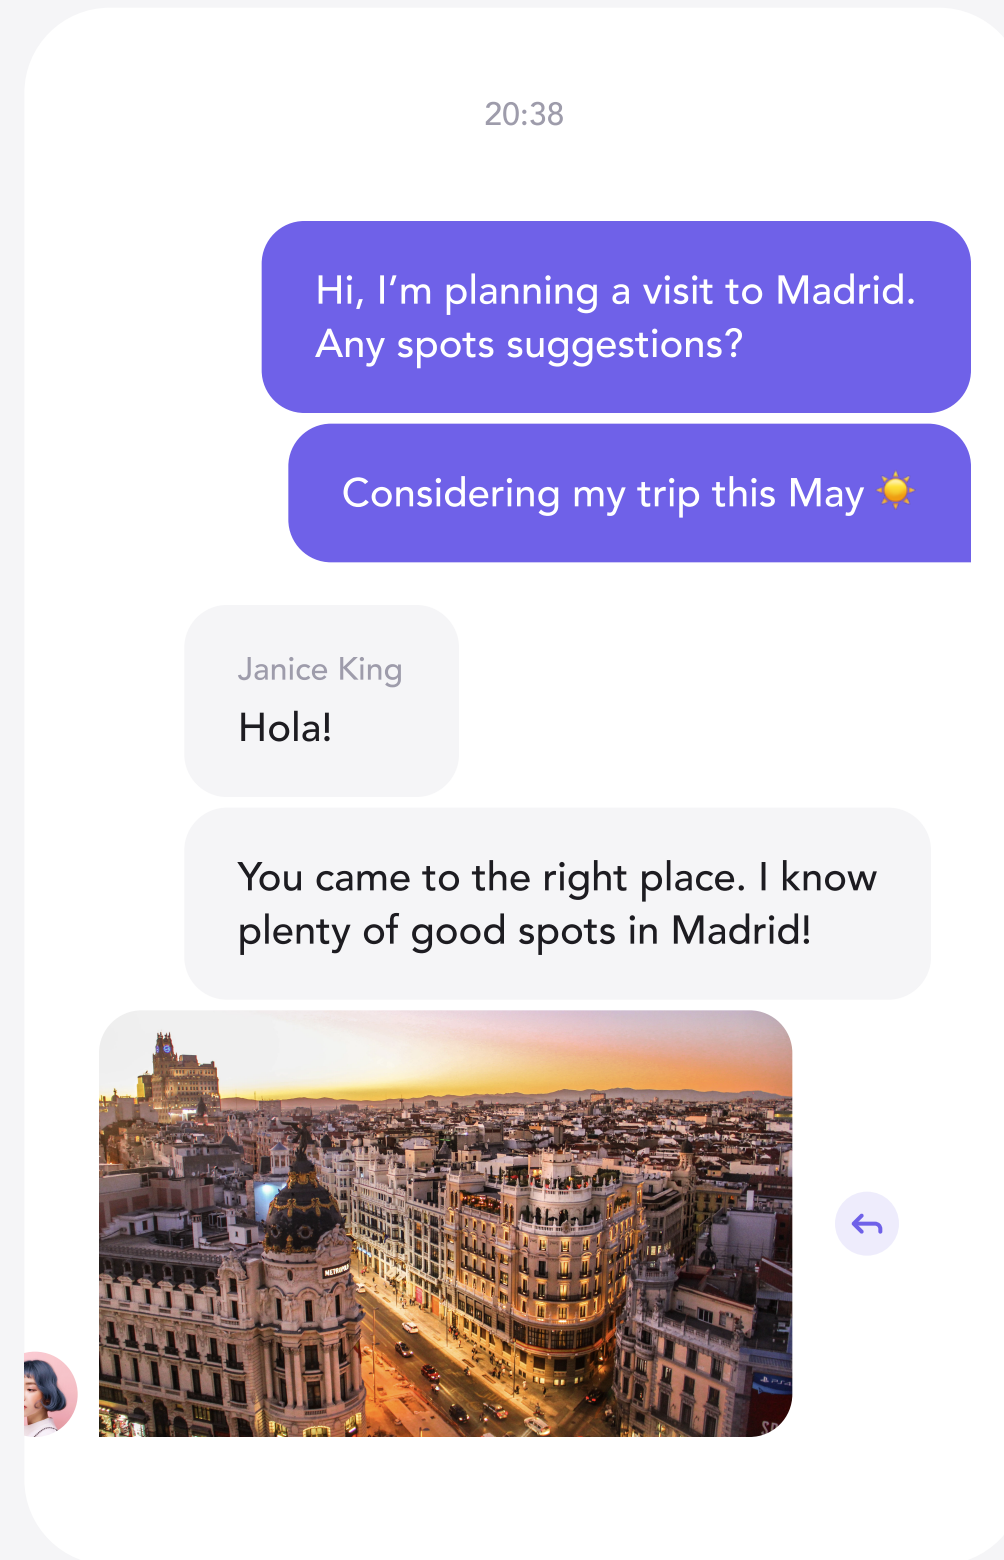

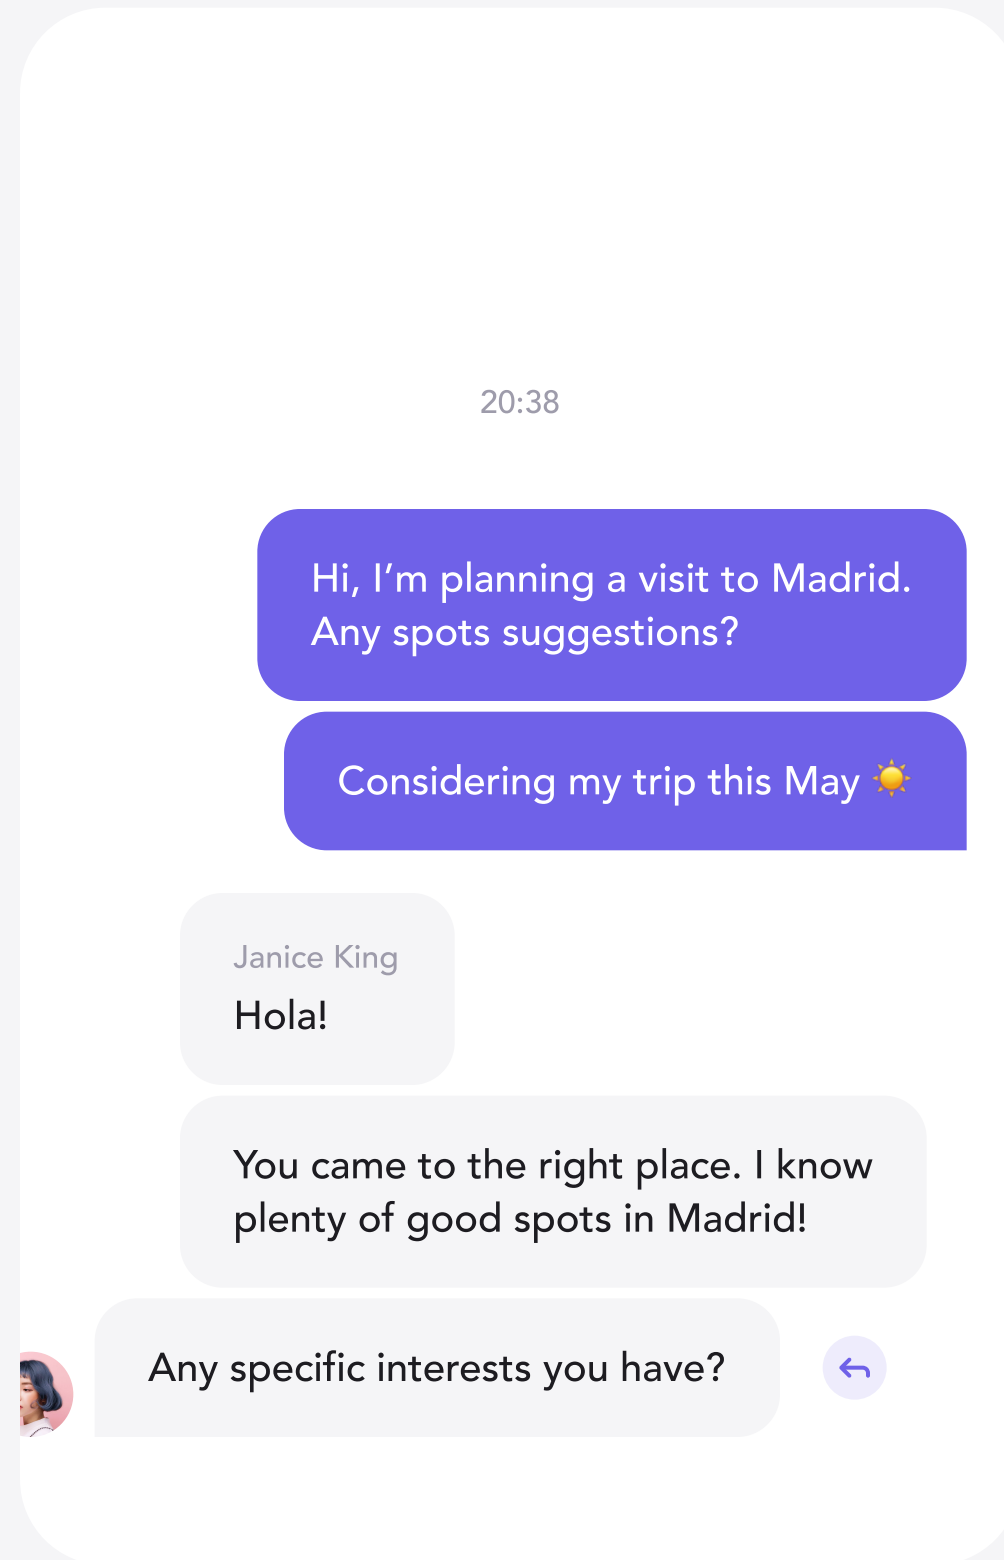

As a regular user, I want to be able to reply to a specific message in the chat so that the conversation can be more clear and structured.

Reply on Swipe: ACs

- 👉 In order to reply to the message, user has to swipe on it from right to left.
- 👉 Reply icon appears on the leftside of the message suggesting the following action.
- 👉 User can reply to their own messages as well as to those sent by others.
- 👉 Reply feature is applicable to all currently existing types of messages (text, image, file).
- 🚫 Reply icon animation is not required.

Hi, I'm planning a visit to Madrid.
Any spots suggestions?

Considering my trip this May 🌞

swipe right to left

Janice King
Hola!

You came to the right place. I know plenty of good spots in Madrid!

Any specific interests you have?

💡 Constraints are provided in points (pt).

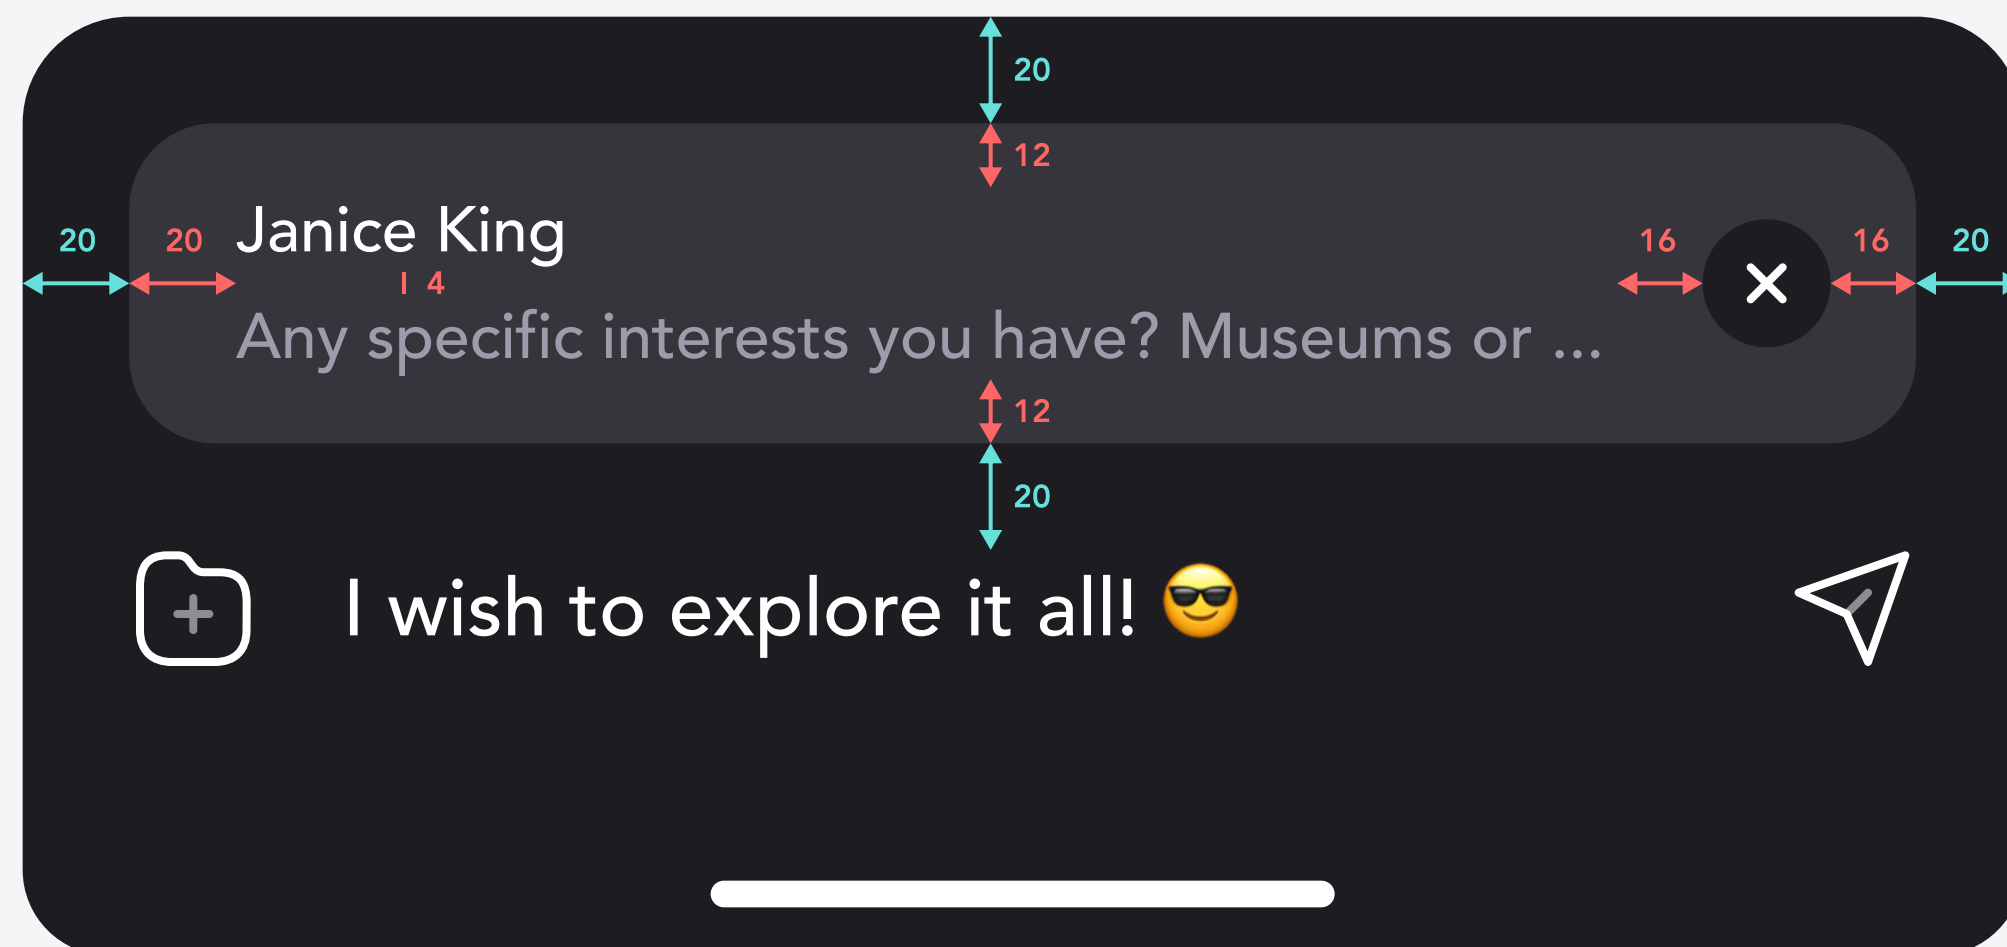

💡 Reply icon can be taken from the project assets library (see icon-reply). Circle is drawn in code.

Reply on Text: ACs

- 👉 Preview of the text message we're replying to displays author's full name and text message.
- 👉 If text message can not be fit in one line, use a truncate function.
- 👉 Preview can be dismissed by clicking on x button which results in turning the message input field into its default state.
- 👉 Reply message that has been sent has a vertical line on the left of it.
- 👉 In case of a message with author's name displayed, make sure to put the preview between full name and text message.

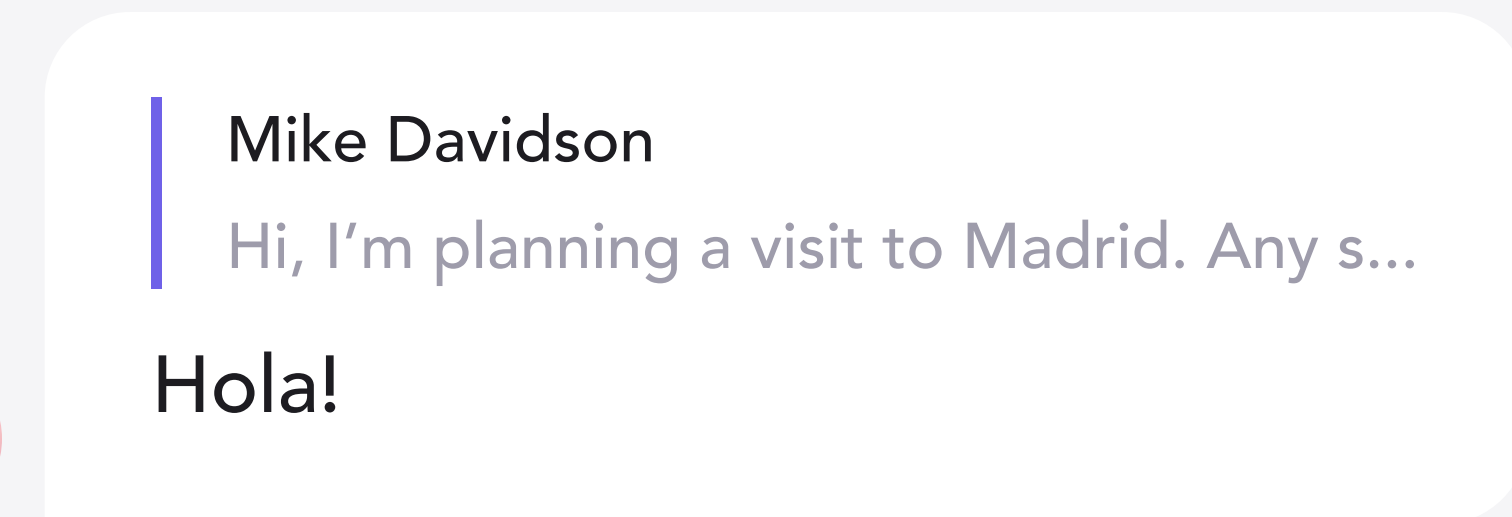

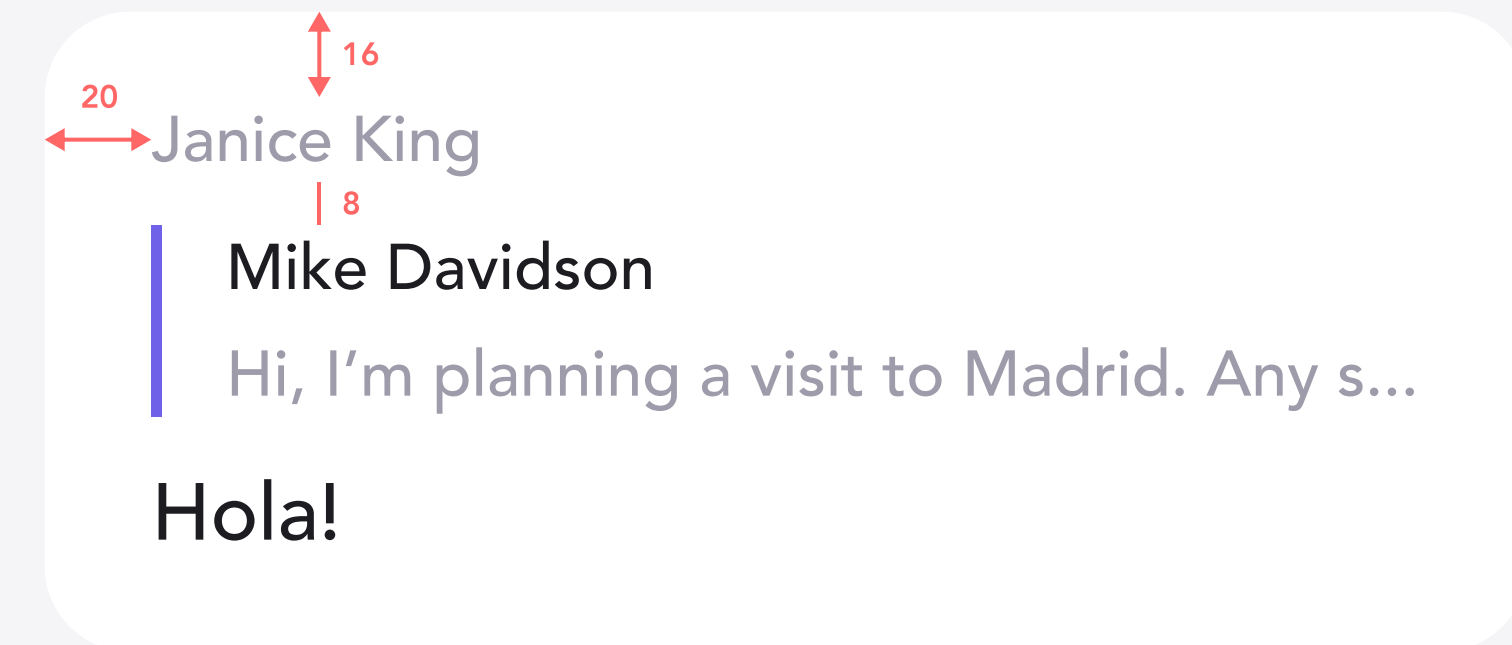

- 👉 **Title**
12 pt, Avenir Medium, NEUTRAL_7 with 100% opacity.
- 👉 **Message**
12 pt, Avenir Medium, NEUTRAL_2 with 100% opacity.
- 👉 **Background**
NEUTRAL_2 with 20% opacity, border radius 16 pt.

💡 Constraints are provided in points (pt).

💡 Dismiss icon can be taken from the project assets (see icon-x). Circle is drawn in code.

Reply on Image: ACs

- 👉 Preview of the image message we're replying to displays author's full name, image snippet and 'Photo' label.
- 👉 Preview can be dismissed by clicking on x button which results in turning the message input field into its default state.
- 🚩 Currently, Flyer Chat does not support image and text messages combined in one. That's why we use 'Photo' label in the message preview. Later it can be replaced with a custom message if user provided additional text to their image.

👉 Image

Border radius 12 pt.

👉 Title

12 pt, Avenir Medium, NEUTRAL_7 with 100% opacity.

👉 Label

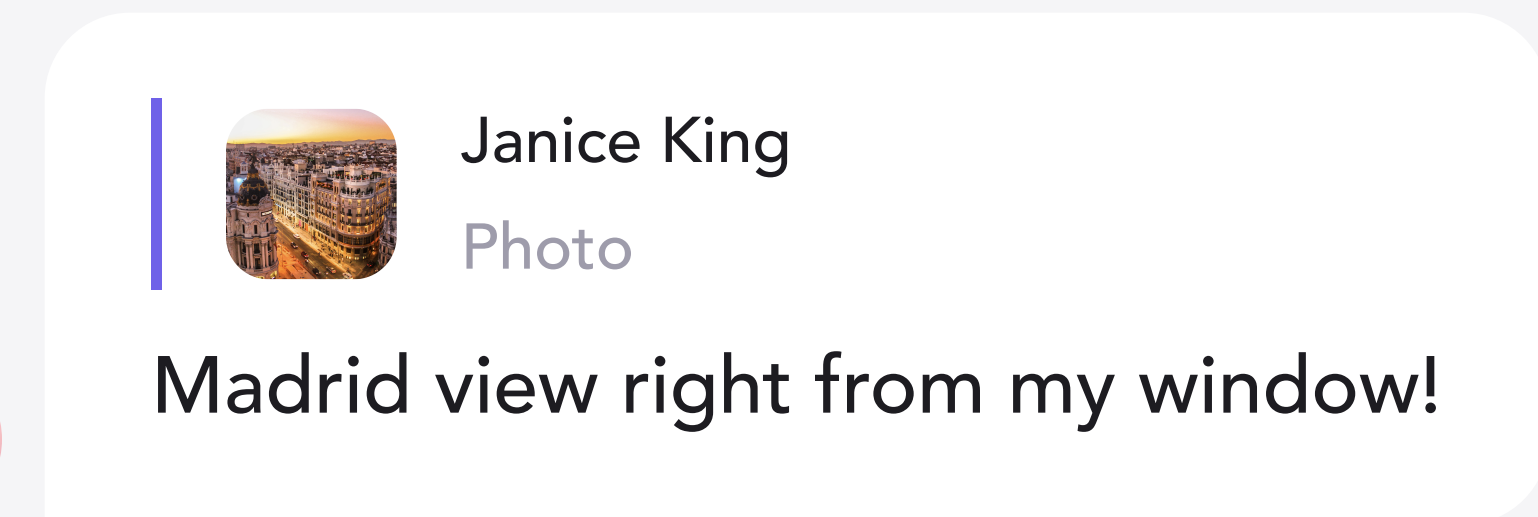

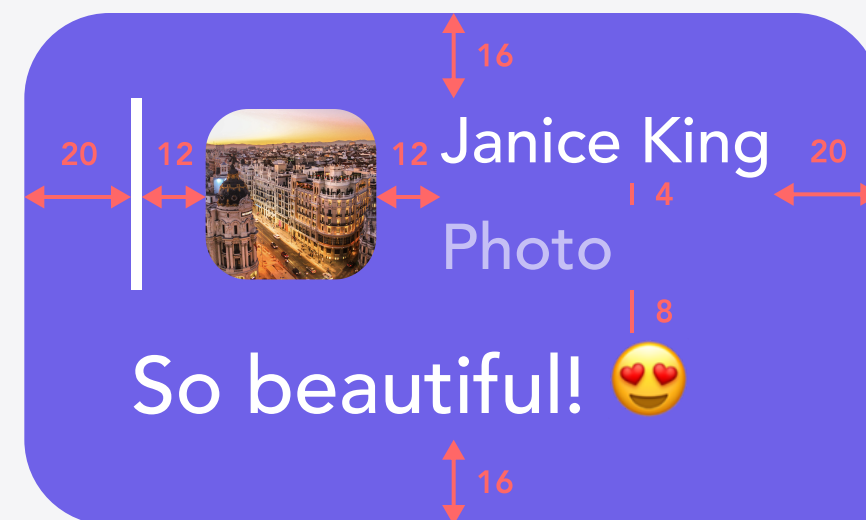

12 pt, Avenir Medium, NEUTRAL_2 with 100% opacity.

👉 Background

NEUTRAL_2 with 20% opacity, border radius 16 pt.

💡 Constraints are provided in points (pt).

💡 Dismiss icon can be taken from the project assets (see icon-x). Circle is drawn in code.

Reply on File: ACs

- 👉 Preview of the file message we're replying to displays author's full name and file name with format type.
- 👉 Preview can be dismissed by clicking on x button which results in turning the message input field into its default state.
- 👉 Specifications are the same as for text messages.

Thank you for contribution!
